

PE1404/T

NHS Shetland Response to Insulin Pump request from the Public Petitions Committee

Request made 11th January 2013

Response made 8th February 2013.

In order to meet the insulin pump targets set by Scottish Government, NHS Shetland would be expected to have four children under eighteen using pumps and six adults.

We are on target to meet the position for both under eighteens and adults by the agreed dates.

Kerry Russell

Assistant Director of Clinical Services
