Re: petition PE01530

To myself, as an educator, it is both depressing and shocking to think that The Scottish Government would give credence to the teaching of creationism in our schools. Creationism is *not* science, it is myth. Evolution is scientific fact, creationism is not. Creationism is faith based ideology, and does not belong in the classroom. I would hope that, as in England and Wales, the Scottish Government could put guidelines in place to stop the **proselytising** of creationism in our schools.

I would like to add my name to those who signed the petition PE01530.

Thank you for your consideration.
