

PE1530/Q

Lee Warren Email of 7 November 2014

I write to support the petition PE01530.

Children deserve to receive the best education available to them and, in the realm of science, they deserve to benefit from learning the wonders of the natural world as tested and described by the scientific method.

Well-funded religious groups are making considerable efforts to bring religious propaganda into schools by attacking the science of evolutionary theory. It's important that there is official guidance as to the teaching of evolutionary theory and a clear barrier drawn between established scientific fact and religious origin myths. The latter should be confined to religious education lessons.

Yours faithfully,

Lee Warren
