

PE1463/UUUU

Maureen Hardie submission of 29 May 2019

I am writing to ask that this petition is not closed as, although the members have been very sympathetic, very little progress has actually been made.

The members of the committee are no doubt frustrated by this but imagine how devastating this lack of progress is for those of us suffering because of the still atrocious lack of diagnosis and suitable treatment.

If you, as members of the Scottish Parliament, have had so little success in making things happen I don't know what we as patients can do. There is much talk of patient participation in treatment but absolutely no action.

I beg you to please try and bring some light to the horrendous situation so many of us find ourselves in.
